

Do we really want a person euthanizing animals in our county who is not a veterinarian or a vet technician?

I feel we pay enough taxes in this county to be able to afford a vet as an administrator of Animal Control.

We pay as much if not more taxes than most of the metro east area can we at least have the humane standards they do?

Below is a list of our County Board members and their contact information. Please if this disturbs you as much as it does me please let your county board member hear about it.

This is not about politics or activism it is about doing the right thing for those with no voices.

Help get the citizens of Clinton County educated.
